  - **C ,C++**
  - **SQL**
  - **Java,Javascript**
- **Frameworks & Libraries**
  - **HTML**, **CSS**
  - **ReactJS**, **NodeJS**, **MongoDB**
- **Version Control**
  - **Git**,**Github**

COURSEWORK SUBJECTS

- **Operating System**
- **Computer Networks**
- **Object Oriented Programming**
- **Database Management System**

EDUCATION

B.Tech. (CT) - 8.45 CGPA
Priyadarshini College of Engineering

📅 2020 – 2024   📍 Nagpur, Maharashtra

PROJECTS

GCONNECT: Real Time Chat Application

- **ReactJs | NodeJs | Socket.io | MongoDB**
- The chat application has a login and register page with form validations.
- Avatars are dynamically generated from the Multi-Avatar API.
- Users can send messages and emojis in real-time using Socket.
- The application is blazing fast as it handles everything without calling any APIs. Github

DevDetective: Github User Search

- **HTML | CSS | Javascript**
- Created a JavaScript online application that lets users search for and see GitHub users' profiles, which include bios, repositories, and follower counts.
- The user can also switch between different modes on the site, including dark mode and light mode. Github

Foodie: Food Delivery App

- **HTML | CSS | ReactJs | Parcel.Js**
- Multi Multi Select Cuisines Based Restaurant Filter, Search Based Restaurants Filter, Shimmer UI CORS Extension for Fetching Swiggy Live API Data from Swiggy Public APIs, Tailwind CSS Class Based Components, React Router DOM for routing navigation, Lazy Loading Context API, Lifting The State Up. Github
